

PupSTEP Wood Pet Stairs Care & Use Guide

Thank you for purchasing the Solvit Products PupSTEP Wood Pet Stairs. These sturdy wood stairs are an attractive choice for helping pets reach their favorite places.

TIP: As a natural wood product, some variability in the color and grain of the stairs is normal. If small nicks or scratches occur, the finish can be restored using colored furniture polish (such as Old English®).

NOTE: Due to the size of the treads, the Large size Wood Stairs are intended for small to medium size pets; the Extra Large size is intended for medium to large size pets, or for any pet trying to reach a taller bed.

The stairs require no assembly. The back legs are held in the open position by means of a wood locking brace, located under the top step. Swing the back leg away from the main stair section until the locking brace falls into position. When the brace is in the locked position, the edge of the brace will overlap the top edge of the leg (see nearby image). Test to make sure the locking brace is in position by attempting to fold the legs back to the main stair section: if they cannot be closed, the brace is correctly positioned. Now place the stairs in the desired location next to a couch, bed, etc. To fold the rear leg section for storage or transport, simply reach under the top step and press up on the wood locking brace to disengage it from the rear leg section.

Cleaning: Promptly wipe up any foreign matter or liquid with a damp cloth or sponge.

Warranty: The PupSTEP Wood Stairs are warranted to be free from defects in materials or workmanship for a period of one (1) year from date of purchase. A copy of the original sales receipt is required for warranty issues.

SOLVIT Products is dedicated to offering innovative solutions to improve pets' quality of life. Please feel free to contact us with any questions, comments, or warranty issues. Thank you for your purchase!
