

EN Installation Instructions

1. Uninstall your Microchip Cat Flap. Remove battery cover and batteries, set aside.
2. Use a cross-head screwdriver to remove back cover.
3. Carefully remove the inner tunnel and set it to the right of the front frame, ensure not to stretch any antenna wires.
4. Remove the old flap and replace it with the new, replacement flap.
5. Replace inner tunnel carefully so the motion sensor is visible inside the tunnel, tuck in the wires.
6. Reattach the back cover to the front frame.
7. Replace batteries and battery cover then reinstall the unit.
8. Visit www.petsafe.com for more detailed information.
