

MAY 2013

**RADIO SYSTEMS CORPORATION (RSC) UNVEILS
NEW PRODUCTS AT ZOOMARK
STAND A60, HALL 19 (PetSafe) & STAND 27, HALL 22 (RSC)**

Radio Systems Corporation, owners of Petsafe®, is taking two stands at this year's Zoomark 9-11 May. At stand A60 in hall 19, PetSafe will be displaying the latest products from its Containment Systems, Training Systems and Bark Control categories. These include the **Stay + Play Wireless Fence** advanced containment system, the **ST-100 Remote Trainers**, the **ST-70 Basic Remote Trainer** as well as a range of new bark control products including the **Deluxe Outdoor Bark Control** and the **Ultrasonic Bark Control**.

Following the recent acquisition of **ScoopFree** and **FroliCat** visitors to the show will also be able to see these product lines for the first time under the Radio Systems Corporation banner at stand 27 in hall 22.

PetSafe's products are developed following extensive animal behaviour research and are designed to enhance the special relationship between owners and their pets. The **ST-100 Remote Trainers** boasts new technology with 16 levels of static stimulation, which are easy to follow on an advanced digital display. The training aid allows owners to train their dog from as far as 100 metres - quickly teaching the dog to associate behaviours with the training. The collars are available in two sizes for little (over 3.6 kg) and big dogs (over 18 kg). The **ST-70 Basic Remote Trainer** has 12 levels of stimulation and allows training up to 70 metres and is suitable for small and large dogs over 3.6 kg.

Zoomark 2013 will also see a new addition to the Containment Systems category with **Stay + Play Wireless Fence** which allows dogs to roam freely within a 32-metre radius. The dogs are warned when approaching the boundary, firstly through an audible tone and then by a harmless static stimulation, which gains the pet's attention. The fence is suitable for dogs over 2.3 kg.

More...

The **Deluxe Outdoor Bark Control** system, on the other hand, has been designed to curb unnecessary and excessive barking with a programmable timer that allows owners to decide when they want to activate the device. The waterproof and behaviourally responsive system deters barking by emitting an unpleasant but harmless ultrasonic tone in reaction to a dog's bark; when the barking stops, so does the tone. Similarly, the new **Ultrasonic Bark Control** collar emits a tone and can be worn by dogs over 3.6 kg. Both products are inaudible to most humans.

PetSafe's Drinkwell® Ceramic Avalon Pet Fountain will also be on display at Zoomark 2013. These superb pet fountains ensure pets remain hydrated throughout the day through dual patented free-flowing streams of water, which add oxygen for freshness, while replaceable charcoal filters remove bad tastes and odours. The fountain holds up to two litres of water, with two drinking areas.

International Marketing Director, Angela Critchley: "We are constantly looking for ways to expand and improve our product offering in order to meet the needs of today's pet owners. Having steadily built on our core areas of Containment, Training and Bark Control Systems through NPD, we've also expanded into new categories by means of acquisition."

Following the acquisition of **ScoopFree** and **FroliCat**, visitors to stand 27, Hall 22 will also witness these innovative products under the Radio Systems Corporation banner for the first time in Europe. A convenient self-cleaning litter box, **ScoopFree** cat litter trays offer a sought after solution to indoor pet waste management and are effective for weeks at a time. Disposable trays and premium crystal litter ensure minimal hassle for the owner and eliminate unwanted odour.

The **FroliCat** range, consists of a selection of cat toys to stimulate and engage; **FroliCat Bolt, Dart, Flik** and **Pounce** feature a combination of rotating, zooming, darting and twitching objects for the cat – or dog – to 'prey' on.

ENDS
